

PIVOTECH

PROJECT LEADER

Start: August 2017, on agreement
Application: Until 16 June 2017
Employment: Permanent, Full time
Work Place: Office in Malmö, Sweden

Pivotech is the leading company in design and planning of skate parks and skateable architecture throughout Scandinavia. At several occasions, we have been awarded prizes for our works. We are working as engineers, architects and landscape architects. Most of our employees has a passion for skateboarding. Our goal is now to evolve and broaden our company by working in areas within conventional landscape architecture and architecture. At the same time, we will hold on to our roots and remain a modern and progressive company.

Are you an architect, landscape architect or engineer with some years of work experience in the industry and would like to take part in the future development of Pivotech?

The past years we have been working out of Copenhagen. During the start of 2017 we have created new conditions for ourselves with new creative spaces in Malmö. We are sharing a larger office space with a combination of other exciting businesses. In addition to the office areas here will be a showroom and possibilities to use the workshop facilities.

You as an applicant has some years of experience from the architecture and consulting industry. At your former work place(s) you have planned and taken responsibility over your own time and projects. During your work life, you have built a network of contacts with partners, customers and colleges. We are working with 2D- and 3D-CAD and you handle this in an effective way. You also handle Office and relevant Adobe software.

At Pivotech you will be working with everything from early analysis and sketches, continuing to design stages and detailed planning. I many of our projects we take on tasks during the construction phase and do follow ups on our work in the Nordic countries. In your role you will be given the opportunity to take part in the evolvement of the company and for us look into new scope of works and working methods. The work is flexible and relatively free but comes with big responsibility.

We are looking for you who is creative, committed, responsible and likes to work independently. You are a quick learner and creates your own routine when the situation demands it. You see the opportunity of evolving the company together with us as exciting. To enjoy the work you appreciate the broad spectrum of work tasks and the versatility of the work place. We encourage you as a woman to apply.

The application consisting of CV, personal letter and eventually a portfolio is to be sent to: fn@pivotech.se
If you have questions about the post or application please contact Fabian Narin at +46 704166417 or at fn@pivotech.se

We look forward to your application!
